**A basic installation will consist of:**

- 1 hour of drive time (*\$25 an hour for additional driving*).
- 1 Trip to Install location(*Additional service calls will be billed at \$160 each*).
- Assembly of unit and mounting to your roof .
- Up to 100 ft of coax cables run inside to the unit location(*\$1 per each additional foot*).
- The indoor transmitter/receiver modems plugged into the unit.
- Signal tested on the system.
- Internet connectivity on the system by open browser to one website.
- If additional work is needed, additional charges may apply.

**\* Networking is not normally a service provided**

**Permit Waiver.** Customer acknowledges and understands that various permits may be required by local authorities when installing a satellite antenna and that it is the Customer's responsibility to obtain all required permits prior to commencement of the installation (*Oregon Customers will be assessed a \$100 LEA permit fee*) . Customer acknowledges that if any of the above information is incorrect, they are responsible for notifying Ground Control, failure to do so may delay installation and increase cost of install. Customer understands that there may be additional charges should an installation require more than what is listed in the Basic Installation package.
